

Let's draw faces with FINE ART STARTS!®

A few tips: 1). Draw lightly so you can erase your lines if you want to change something. 2). Place eyes half-way down the face. 3). The width of the mouth can be measured by the distance between the center of the pupils in the eyes. 4). Top of ears attach at the same level as the eyes (half-way down the face) and at the same level as the nose. 5.) The neck is as wide as the outside edges of the eyes.
